DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the claims recite a frame assembly and light for covering a wall conduit in a wall, the wall conduit having components requiring access outside the frame assembly, the frame assembly having a light, an electrical circuit providing electrical energy to the light from a power source, a rectangular frame through which the electrical component is accessible, the frame housing the electrical circuit, the frame having sides with a depth sufficient to house the light, and the frame having an aperture in at least one of the sides allowing the light to illuminate a space outside the frame assembly through the aperture, and a cover plate separate from the frame and for covering the frame and for providing access to the component of the wall conduit. Because none of the references cited disclose the detailed structural limitations of the aperture on the frame assembly allowing the light to illuminate a space outside the frame and where the cover plate being separate from the frame for providing access to the component of the wall conduit, nor is there any motivation to combine them, the claims are deemed patentable over the prior art of record. Claims 14, 15, 22, 24, 25, 31-39, & 41-53 allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Amendment

3. Examiner acknowledges that the applicant has amended claims 22, & 48-50. Claims 14, 15, 22, 24, 25, 31-39, & 41-53 are pending in this application.
